Investment Objective, Policy and Restrictions

Investment Objective

The investment objective of the Sub-Fund is to provide, over the long-term, the potential for a level of return commensurate with equity risk returns while adopting a worldwide investment strategy through the investment primarily in transferable securities, exchange traded funds as well as CISs.

There is no guarantee that the investment objective of the Sub-Fund will be achieved and investment results may vary substantially over time.

Investment Policy

The Investment Manager shall invest primarily in a diversified portfolio of (a) transferable securities including equities as well as sovereign and/or corporate bonds and notes, (b) listed exchange traded funds, and (c) listed/un-listed CISs that invest predominantly in equities and/or bonds. The Investment Manager will not invest in CISs which will have a management fee in excess of 3%.

In seeking to achieve the Sub-Fund's investment objective, the Investment Manager will follow the principle of risk spreading and will invest the assets of the Sub-Fund over a broad base of issuers and industries. The Sub-Fund is not expected to be biased towards any market or sector.

The Investment Manager shall manage the credit risk and will aim to minimise interest rate risk through credit analysis and credit diversity.

The Investment Manager will select the target transferable securities following an assessment of the value of the target investment, the anticipated return and growth potential.

The Investment Manager may invest directly or through CISs in listed equities but will not be targeting equities of a particular market capitalisation.

The Investment Manager will not be targeting bonds of any particular duration or any particular credit rating and the bonds could have a fixed or variable coupon.

The Investment Manager may invest in all of these asset classes either directly or indirectly through UCITS Funds and/or eligible non UCITS Funds. The Investment Manager may invest in CISs established in the EEA countries or authorised under laws which provide that they are subject to supervision considered by the MFSA to be equivalent to that laid down in Community law.

The investment Manager will not invest in CISs with whom the Investment Manager is in/directly involved with.

The Investment Manager may invest up to 10% of the total assets of the Sub-Fund in unlisted equities and bonds.

The Investment Manager may also make use of listed and OTC FDIs (including, but not limited to, futures, forwards, and options) linked to bonds, interest rates and currencies for , hedging purposes and the reduction of risk only. The Sub-Fund will not make use of FDIs for investment purposes. The Sub-Fund is not expected to employ any leverage or gearing.

The Sub-Fund may hold cash and cash equivalents on an ancillary basis.

The Fund has 4 (four) hedged Share Classes, which are designated as such in this Offering Supplement. In respect of the hedged Share Classes, the Management Company has the ability to fully hedge the Shares of such Share Classes in relation to the Fund Currency. In this instance currency exposures or currency hedging transactions within the Fund's portfolio will not be considered.

In this instance, for the purposes of hedging at Share Class level, the Investment Manager will enter into OTC FDIs in the form of forward contracts with eligible counterparties. It is the intention that the hedged Share Classes B, C, E and F closely mirror the price movements of Share Classes A and D (in GBP) accordingly and the forward contracts will be carried out for Share Classes B and E by selling GBP against USD, and Share Classed C and F by selling GBP against EUR at a forward date and rate.

The Management Company will review hedged positions at every valuation point to ensure that (i) over-hedged positions do not exceed 105% of the Net Asset Value of the hedged Classes and (ii) under-hedged positions do not fall short of 95% of the portion of the Net Asset Value of the hedged Classes which is to be hedged against the currency risk. This is to avoid the transaction costs of making small and frequent adjusting transactions.

The Sub-Fund will not enter into any securities financing transactions, total return swaps, repurchase and reverse repurchase agreements or securities lending transactions.

There can be no assurance that the Investment Policy will be achieved and investment results may vary substantially over time.

Investment, Borrowing and Leverage Restrictions

Other Expenses

The Sub-Fund will also be subject to other fees including, its pro-rata share of the Directors and Company Secretary Fees and other operating expenses relating to the Company generally as set out in the Prospectus.

SPECIFIC RISK FACTORS

IN EVALUATING THE POTENTIAL AND SUITABILITY OF AN INVESTMENT IN THE SUB-FUND, CAREFUL CONSIDERATION SHOULD BE GIVEN BY PROSPECTIVE INVESTORS TO THE RISK FACTORS SET OUT IN THE PROSPECTUS AS WELL AS TO THE FOLLOWING RISK FACTORS.

IT IS RECOMMENDED THAT PROSPECTIVE INVESTORS CONSULT THEIR OWN ADVISORS ON LEGAL, TAX AND FINANCIAL ISSUES THAT ARE RELEVANT FOR THEIR SPECIFIC SITUATION, AS THE INFORMATION HEREIN SHOULD BE REGARDED AS GENERAL INFORMATION.

THIS FUND MAY NOT BE APPROPRIATE FOR INVESTORS WHO PLAN TO WITHDRAW THEIR INVESTMENT IN THE COMPANY WITHIN THREE YEARS FROM WHEN THE INVESTMENT IS MADE. THERE CAN BE NO GUARANTEE THAT THE INVESTMENT OBJECTIVE OF THE SUB-FUND SET OUT HEREIN WILL BE ACHIEVED.

Investors' money shall be invested in open positions on equity indices, in fixed income securities and eligible fixed income short-term ETF's. In addition, investors' money may also be invested in UCITS eligible Collective Investment Schemes selected by the Investment Manager. These financial instruments and eligible UCITS Collective Investment Schemes shall be subject to the evolution and fluctuations of the market. This risk profile of the Sub-Fund is suitable for an investment horizon of at least 3 years.

Like any financial instrument, potential investors should be aware that the value of the Sub-Fund's assets is subject to the fluctuations of the international equity and bond markets and that it may vary substantially. Investors receive no guarantee that they will get back the invested capital.

The risk factors described in this section and in the Prospectus are not exhaustive. It is up to each Investor to analyse the risk associated with such an investment and to form his/her opinion independent of the Investment Manager of the Sub-Fund, where necessary seeking the opinion of any advisors specialised in such matters in order to ensure that this investment is appropriate in relation to his/her financial situation.

The discretionary management style is based on expectations regarding the performance of different markets (equities, bonds). There is a risk that the Sub-Fund might not be invested in the best-performing markets at all times.

Equity risk: The Equity Component is exposed to the equity risk of the eurozone, international and emerging markets through investments in financial instruments. Furthermore, regarding the small and mid-cap markets, the volume of stocks listed on a stock exchange is relatively low; market downturns are therefore more acute and more abrupt than for large caps. The net asset value of the Sub-Fund may therefore decline rapidly and significantly.

Hedging Risk

The performance of hedged Share Classes aims to be similar to the performance of equivalent Share Classes in Fund Currency. There is no assurance however that the hedging strategies employed will be effective in delivering performance differentials that are reflective only of interest rate differences adjusted for fees. Where undertaken, the effects of this hedging will be reflected in the Net Asset Value and, therefore, in the performance of such additional Share Class. Similarly, any expenses arising from such hedging transactions will be borne by the Share Class in relation to which they have been incurred. Cash collateral received in connection with currency hedging transactions (and in particular currency forward transactions) on behalf of currency hedged Share Classes, may be reinvested, in compliance with the applicable investment policy and restrictions of the Funds. The interest rate differential between the Base Currency (GBP) and the currency share class being hedged determines the effectiveness of the hedge at share class level throughout the lifetime of the forward contract.

It should be noted that these hedging transactions may be entered into whether the Reference Currency is declining or increasing in value relative to the relevant Fund Currency and so, where such hedging is undertaken it may substantially protect Investors in the relevant Share Class against a decrease in the value of the Fund Currency relative to the Reference Currency, but it may also preclude Investors from benefiting from an increase in the value of the Fund Currency. In addition the Investment Manager may hedge the Fund Currency against the currencies in which the underlying assets of the Fund are denominated or the underlying unhedged assets of a target fund are denominated.

There can be no assurance that the currency hedging employed will fully eliminate the currency exposure to the Reference Currency.
